

CHRISTMAS TREE NETTING

Through our long experience in manufacturing Christmas Tree Netting, we are in the position to deliver high quality guaranteed products.

APPLICATION:

- A major saving in transport costs for the grower of up to 50% more loading volume.
- The tree is well protected, no more broken branches.
- More easy handling of the tree.
- Convenient transport either in a boot of a car or on the roof rack.

CHRISTMAS TREE NETTING

The net is delivered on a cardboard liner in the sizes specified below. For easy identification the product type is colour coded, on the label as well as on the starting point of the sleeve. We can provide you with the answer to any question that may arise at grower or dealer level. Through our long experience in manufacturing Christmas tree netting and being the market leader in this sector we are in the position to deliver high quality guaranteed products. Manufactured with premium grade raw materials which incorporates the latest technology of machinery.

CHRISTMAS TREE PACKAGING MACHINE

An additional part of the range are our packaging machines. These have a very long life expectancy through their solid construction.

Our standard machine is made from strong galvanised sheet steel. Coloured two-part frame and two-part tube for easy handling and storage, including a breaking system and a net cutter. Available in the following tube diameters 25 cm, 34 cm, 45 cm, and 55 cm.

Different models available on request.

ST-TAPE NETTING		
Type	Sleeves/Bale	Bales/Palett
ST 25 PB	10 x 300 m	20
ST 31 PB	10 x 300 m	20
ST 34 PB	10 x 300 m	20
ST 45 PB	10 x 300 m	15
ST 55 PB	5 x 300 m	20
ST 60 PB	10 x 150 m	18
ST 90 PB	on request	on request

ST-MONO NETTING		
Type	Sleeves/Bale	Bales/Palett

LZ 45	12 x 250 m	15
LZ 55	5 x 250 m	20

ST-TAPE NETTING

Manufactured from Hostalen Strip. An alternative to the well established higher quality products of the range. A product specially designed for where the demands are lower.

ST-MONO NETTING

Manufactured with monofilament threads. Our premium product which has been established over 22 years and which meets the highest specifications. Recommended by growers for the strong tensile strength, problem free running on automatic packaging machines and a high frost resistance. The wide diamond mesh construction leaves the tree the chance to breath and will let water onto the packed tree, which is important for longer term storage. We guarantee the highest possible output with the lowest waste.

LZ-TAPE NETTING

Manufactured from Hostalen Strip. A strong quality product which is either useable for automatic packaging or on normal hand packaging machines.

A small mesh construction guarantees perfect transport protection for the top branches of the tree because of a very tight packaging. Recommended for the well known Nordmann pines.
